THIRD PARTY TECHNICAL CYBER SECURITY REVIEW CERTIFICATE

Funäsdalen, 2024-02-01

Swedish cyber security company Triop AB has conducted an independent third-party technical cyber security review (penetration test) of Device Firmware Monitor (DFM) and DevAlert by **Perceptio AB**.

The overall external cyber security of devAlert and DFM is excellent. The security review found no critical, high, medium, or low-impact security vulnerabilities.

In June 2023, Senior Cyber Security Specialist Jonas Lejon tested the services for approximately two weeks. Penetration re-testing was conducted again in December 2023.

The methodology is based on the OWASP Top 10 list and NCSC Tailored Assurance Service (CTAS).
